SUMMARY

As a Computer Science and Engineering student at the National Institute of Textile Engineering and Research (NITER), I am passionate about software development, problem-solving, and exploring cutting-edge technologies. My strong foundation in programming languages like C++, JavaScript, and Python. I am also deeply interested in Machine Learning and Blockchain.

PROJECTS

Online Survey Website

React.js, Node.js, Express.js, MongoDB.

<https://survey-web-app-04.web.app/>

- **Developed a full-featured survey platform using the MERN stack**, allowing users to create, vote, and analyze surveys with real-time data visualization.
- **Implemented role-based access control and JWT authentication**, securing private routes for users, surveyors, and admins.
- **Integrated Stripe for pro-user subscriptions**, enabling payment processing and premium feature access

Service-Related Website

React.js, Node.js, Express.js, MongoDB.

<https://home-repair-service-03.web.app/>

- **Developed a full-stack application** utilizing technologies such as React for the frontend and Node.js for the backend, allowing seamless integration of user data and dynamic content updates.
- **Implemented API interactions** with asynchronous JavaScript functions, handling data fetching and user interactions, while optimizing user experience by adding loading spinners and state management hooks.

Simple E-commerce Website

HTML, CSS, Bootstrap, Python, Django.

<https://github.com/dear-mahmud-bd/plumbing-parts>

- **Developed a full-stack application** utilizing technologies such as HTML, CSS, Bootstrap for the frontend and Django for the backend.
- **Integrated SSLCMMERZ** for buying products and also added product review functionality.

My Medical -Android App

XML, Java, PHP, SQL, Volley library.

https://github.com/dear-mahmud-bd/android-app-dev/tree/main/021_MyMedical

- **Developed "My Medical" Android app**, a secure platform for storing and accessing medical records, improving doctor-patient communication.
- **Implemented role-based access control and data encryption** to ensure compliance with healthcare regulations
- **Integrated telemedicine features** for remote consultations, enabling digital prescriptions and medical history access.

EDUCATION

Bachelor of Science in Computer Science and Engineering

National Institute of Textile Engineering and Research.

📅 02/2022 – Present

📍 Nayarhat, Savar, Dhaka-1350, BD

COURSEWORK

UNDERGRADUATE

Data Structure and Algorithms, Object Oriented Programming, Database Management System, Data and Telecommunication, Computer Networking, Software Engineering.

SKILLS

HTML, CSS, Bootstrap, Tailwind CSS,

C++, JavaScript, Python, React.js,

Node.js, Express.js, Django, SQL,

MongoDB, Firebase, VS Code,

Git & GitHub.

PASSIONS

Tech Education & Mentorship

Committed to mentoring peers, sharing knowledge, and promoting tech problem-solving.

Machine Learning Enthusiast

Passionate about applying ML algorithms to real-world challenges, focusing on predictive models and AI systems.

Blockchain Technology

Excited by blockchain's potential to transform industries through decentralized, secure solutions.

LANGUAGES

Bengali: Native proficiency

English: Limited working proficiency

Hindi: Limited working proficiency
